

## Cooking your Apps ISTE 2013 Project

### Description:

The project's objective is to develop a mobile app to share the learning obtained in the Class of , such as recipes and techniques practiced in the laboratory.

### Schedule of work

Date of working	Theme / Recipe	Team	Mode	Delivery date

### Delivery format

---

#### Podcast with iMovie

This project consists in delivering a file created with Garageband (if it only integrates images) or with iMovie (if it includes videos). It has to include a step-by-step process of a recipe or a class content procedure including text and voice. If you wish to integrate audio background, music should be voiceless (instrumental). Delivery formats are: Mov or M4a.

Others requirements to consider are: a presentation should be given at the beginning of the recipe and the product's final presentation (dish) or the benefit of the information, and at the end some additional suggestions.

#### Step by step illustrated with word

Students have to develop a Word file with the description of the process of preparing the recipe or activity seen in class, describing each step and illustrating them with images.

Students should integrate at the beginning an introduction of the recipe, its usefulness and the product's final presentation (dish) or the benefit of the information and at the end some additional suggestions.

**Aspects to evaluate of the activity:**

<b>Category</b>	<b>Points</b>	<b>Obtained</b>
Clear procedure drafting	5	
Culinary technique (indicate and demonstrate which one it is, and show how to apply it in the preparation of the dish)	5	
Neatness (while cooking and personal presentation)	5	
Use of images that clearly demonstrate the process	10	
Properly integrated audio (voice must be heard perfectly without background noise).	10	
<b>Order in the presentation of information (follow the procedure)</b>		
Introduction to the theme	5	
Demonstration of the ingredients (Mise en place).	15	
Detail of the process	25	
Presentation of the dish (in two different presentations).	10	
Suggestions and / or final comments.	10	
<b>Total</b>		

Important: Projects that do not fulfill established guidelines will not be received. The project that has misspelling words or does not meet the quality standards will be returned so to be corrected and delivered the following week with a grade penalty.
